

Interfaces -- Guided Notes

Unit tp-3.6 | CompTIA Network+ N10-009 Obj. FC0-U71 3.6 | N10-008 FC0-U71 3.6

Name: _____ Date: _____ Period: _____

Complete each question using the lesson reading. Write in the blank or answer in the space provided.

Question 1

A GUI (Graphical User Interface) allows users to interact with a computer using _____, _____, and _____ rather than typed commands. Users point and click with a _____ to open files and launch programs. Windows, macOS, and most mobile OSes use a GUI by default.

Question 2

A CLI (Command Line Interface) requires users to type _____ as text. The CLI on Windows is _____ (cmd.exe) or _____. On Linux and macOS it is the _____. The CLI is preferred by administrators for _____, as commands can be scripted and repeated across many systems.

Question 3

A NUI (Natural User Interface) uses _____, _____, or _____ as input rather than a mouse or keyboard. Voice assistants like _____ and _____ are examples of voice-based NUIs. Gesture-based NUIs are used in gaming (Microsoft _____) and surgical robotics.

Question 4

A touchscreen interface accepts input directly from _____ or a _____ on the screen surface. Capacitive touchscreens detect the electrical conductivity of a human _____ and are used in smartphones. Resistive touchscreens respond to _____ and can be used with a stylus or gloved hand.

Question 5

A menu-driven interface presents users with a list of _____ to choose from. This is more accessible to _____ users but less flexible than a CLI. Examples include ATM screens, kiosk check-in systems, and _____ (basic menus found in the router or BIOS configuration screen).

Question 6

Accessibility features in operating systems are _____ adaptations that make computers usable for people with disabilities. Examples include _____ (reads screen content aloud for visually impaired users), _____ (enlarges text and interface elements), and _____ (allows keyboard control via an on-screen keyboard for users who cannot use a physical keyboard).

Question 7

UI vs UX: _____ (User Interface) refers to the visual elements a user interacts with -- buttons, icons, layout, colors. _____ (User Experience) refers to the overall feeling and ease a user has while completing a task. A UI can look visually appealing but have poor _____ if it is confusing or inefficient to use.

Question 8 -- Real World Application

REAL WORLD: A government agency is deploying a self-service kiosk for citizens to register for public services. The kiosk will be used by elderly citizens, people with low digital literacy, and individuals who are visually impaired. Describe three specific interface design features you would include to make the kiosk accessible and usable for all these groups.

Download the answer key from the class server:
