

Cloud Concepts and Connectivity — Guided Notes

Unit 1.7.2 | CompTIA Network+ N10-009 Obj. 1.7 | N10-008 1.7

Name: _____ Date: _____ Period: _____

Complete each question using the lesson reading. Write in the blank or answer in the space provided.

Question 1

Match each cloud service model to what the customer is responsible for managing:

IaaS → _____

PaaS → _____

SaaS → _____

Question 2

Give one real-world example of each service model:

IaaS → _____

PaaS → _____

SaaS → _____

Question 3

A _____ cloud is shared infrastructure available to any paying customer. A _____ cloud is dedicated to a single organization. A _____ cloud combines both. A _____ cloud is shared among organizations with common requirements (e.g., government agencies).

Question 4

A dedicated cloud connection (AWS calls it _____, Azure calls it _____) differs from a VPN connection because it _____. The tradeoff is _____.

Question 5

In cloud networking, a _____ (VPC/VNet) is an isolated network environment. Within it, _____ divide the address space by purpose. _____ act as virtual firewalls attached to resources, controlling inbound and outbound traffic with stateful rules.

Question 6

The shared responsibility model means that in IaaS, if an attacker exploits an unpatched OS vulnerability on a cloud VM, the responsibility belongs to _____. The cloud provider is responsible for _____.

Question 7

A cloud load balancer sits in front of multiple backend instances and provides: (1) _____, (2) _____, and (3) _____. It keeps the application available when individual instances _____.

Question 8 — Real World Application

REAL WORLD: A teacher reports that Microsoft 365 is slow during first period but fast after 9 AM. The internet connection looks fine from the server room. What cloud-specific factors would you investigate?

Download the answer key from the class server:

```
wget http://[SERVER]/resources/network-engineer/1-7-2-cloud-concepts-and-connectivity/1-7-2-cloud-concepts-and-connectivity-answer-key.pdf
