

Change Management — Guided Notes

Unit 3.3.1 | CompTIA Network+ N10-009 Obj. 3.3 | N10-008 3.3

Name: _____ Date: _____ Period: _____

Complete each question using the lesson reading. Write in the blank or answer in the space provided.

Question 1

Change management exists to prevent _____ changes from causing outages. Studies consistently show that a majority of network outages are caused not by hardware failure but by _____.

Question 2

A change request must include: a description of the change, the _____ (why it's needed), the _____ window (when it will happen), and a _____ plan if the change fails or causes problems.

Question 3

Changes are categorized by risk. A standard change is pre-approved and _____ risk (e.g., adding a VLAN to an existing port). An emergency change bypasses normal approval because of _____. What additional step is required after an emergency change is completed?

Question 4

Before implementing any change, the current configuration should be _____ so that the rollback plan has something to restore to. On a Cisco device, this is accomplished with the command _____.

Question 5

A maintenance window is a scheduled time when changes are permitted, typically during _____ usage hours. Why is it insufficient to simply schedule a maintenance window without also notifying _____?

Question 6

A _____ review (CAB — Change Advisory Board) evaluates proposed changes before approval. In a school IT context, who would typically be stakeholders in a CAB review for a major network

infrastructure change?

Question 7

After a change is implemented, a _____ test verifies the change worked as intended and no unintended side effects occurred. What is the minimum documentation that should be recorded in the change ticket when the change is complete?

Question 8 — Real World Application

REAL WORLD: A network admin updates a firewall rule set on a Friday afternoon without a change request, backup, or rollback plan. The change blocks access to the student grading portal. It takes until Monday morning to identify and fix the problem because the admin is unreachable over the weekend. Identify three change management failures and state what correct procedure would have prevented each.
