

Policies and Procedures — Guided Notes

Unit 3.3.2 | CompTIA Network+ N10-009 Obj. 3.3 | N10-008 3.3

Name: _____ Date: _____ Period: _____

Complete each question using the lesson reading. Write in the blank or answer in the space provided.

Question 1

An Acceptable Use Policy (AUP) defines what users _____ and _____ do with network resources. Why must users acknowledge the AUP in writing (or digitally) rather than simply being told about it?

Question 2

A data classification policy assigns sensitivity levels to data. List the four common classification levels from least to most sensitive and give a school network example of each.

Question 3

The principle of least privilege in access control means users receive only the permissions _____ for their role. A student account that can modify grades violates this principle. What is the process called when access rights are reviewed periodically to remove unnecessary permissions?

Question 4

An onboarding procedure creates accounts and grants access when a user joins. An offboarding procedure _____ accounts and revokes access when a user leaves. What specific security risk does a delay in offboarding create?

Question 5

A password policy typically mandates minimum _____, complexity requirements, and maximum _____ (how often it must be changed). Modern NIST guidance actually recommends against frequent forced password changes unless there is evidence of compromise. Why?

Question 6

A data retention policy defines how long different types of data must be kept before it can be _____. Name one legal reason a school district might be required to retain student records for a specific period.

Question 7

An incident response policy defines the steps taken when a security breach occurs: _____, _____, eradication, recovery, and lessons learned. Why must the 'lessons learned' phase be documented and not skipped?

Question 8 — Real World Application

REAL WORLD: A school district is audited after a data breach exposes 3,000 student records. The auditors find: no AUP, no data classification policy, contractor accounts that were never deactivated, and no incident response plan. For each missing policy, describe the specific harm it allowed in this scenario.
