

Peripherals -- Guided Notes

Unit tp-2.6 | CompTIA Network+ N10-009 Obj. FC0-U71 2.6 | N10-008 FC0-U71 2.6

Name: _____ Date: _____ Period: _____

Complete each question using the lesson reading. Write in the blank or answer in the space provided.

Question 1

_____ are output devices that produce physical copies of digital documents. A _____ printer uses liquid ink sprayed through nozzles and is good for _____ printing. A _____ printer uses heat and a toner drum and is better for high-volume _____ printing.

Question 2

A _____ is an input device that converts a physical document or photo into a digital image file. A _____ combines a printer, scanner, and sometimes a fax machine into one device. When a scanner is connected to a network and shared, multiple users can scan to _____.

Question 3

Keyboards and mice connect via _____ (wired USB) or _____ (2.4 GHz USB dongle or Bluetooth). A _____ keyboard has a physical USB dongle that plugs into the host computer and communicates over a proprietary 2.4 GHz signal, while a _____ keyboard pairs directly with the Bluetooth radio in the host device.

Question 4

A _____ is an input device that translates hand/stylus movement directly on a flat surface into cursor movement on screen, used by artists and designers. A _____ captures live video and audio and is used for video calls. A _____ is a special projector-style input surface that detects touch.

Question 5

Speakers and headphones are _____ devices that convert digital audio signals (passed through a DAC) into _____ sound waves. Headsets combine headphones with a _____ for two-way audio. USB audio devices include their own _____ and do not rely on the motherboard sound chip.

Question 6

KVM (Keyboard Video Mouse) switch allows _____ computers to share a single set of peripherals. The user presses a _____ to toggle control between machines. KVM switches are useful in data centers where many servers must be managed from _____ keyboard and monitor.

Question 7

A _____ converts digital files to 3D physical objects by depositing material layer by layer. The most common consumer type uses _____ filament (plastic) melted through a heated nozzle. A _____ scanner captures the shape of a physical object as a 3D digital model. Together these tools form part of a digital _____ workflow.

Question 8 -- Real World Application

REAL WORLD: A small law office is replacing their aging all-in-one inkjet printer. They print about 500 pages per day in black and white, with occasional color printing for client cover sheets. They also frequently need to scan multi-page contracts. What type of printer/scanner setup would you recommend and why? Consider cost per page, speed, and document handling.
